Students Creation

'One does not have to be great to start, but to be great one has to start'.

We at Kashida Fashion Institute are committed to impart quality Education to youth, enabling them to develop right attitude, professional competence and inculcating right ethical values. It is our step in the direction of overall development of students by extending their knowledge not only in the field of Fashion but also in overall Entrepreneurskills.

This course builds a strong foundation in terms of design sense, conceptualization, independent research, creative application and individual artistic expression. Fashion Designers are the prime trend setters for the world. A designer has to predict consumer reaction and work within the financial budgets for the manufacturing process of the apparel which has to be both fashionable and functional.

Empowering women and creating a platform for today's struggling women was always in my mind and that gave birth to the idea of opening this institute.

Mrs. Trupti Davda
Director
