Eco-Friendly Transportation Policy

1. Vision

To create a sustainable, low-carbon campus by promoting eco-friendly transportation systems that reduce environmental impact, conserve energy, and encourage responsible mobility practices among staff and stakeholders.

2. Mission

- To minimize carbon emissions arising from campus-related travel.
- To promote the use of electric and low-emission vehicles for official purposes.
- To provide efficient and environmentally responsible transportation options outside the campus for shorter distance.

3. Policy Statement

The college is committed in adopting eco-friendly transportation practices to reduce its carbon footprint and environmental impact. The institution shall encourage the use of electric mobility, public transportation, and non-polluting travel alternatives. The college provided e-bike shall be utilized primarily for official work by non-teaching staff and for emergency purposes by teaching staff.

4. Promotion of Electric Vehicles (EVs) and Low-Emission Vehicles

- The college shall provide and maintain an electric bike (e-bike) for official campus-related travel.
- Non-teaching staff may use the e-bike for travel to banks, government offices, or other official duties.
- Teaching staff may use the e-bike during emergencies or urgent official requirements.
- Proper scheduling, log maintenance, and responsible usage of the e-bike shall be ensured.

5. Public Transportation Promotion

- The institution shall encourage staff and students to use public transportation, carpooling, and shared mobility services.

- Preferential support shall be given to official travel using public transport where feasible.
- Awareness regarding public transport routes and schedules shall be disseminated through notices and orientation programs.

6. Eco-Friendly Campus Infrastructure

- Dedicated parking space shall be provided for electric vehicle.
- Safe charging facilities for the e-bike shall be installed and maintained.

7. Education and Awareness

- Awareness programs shall be conducted to educate staff and students on the benefits of eco-friendly transportation.
- Environmental sustainability shall be integrated into institutional activities, campaigns, and observances.

8. Continuous Improvement

- The college shall periodically assess the effectiveness of its eco-friendly transportation initiatives.
- Feedback from staff and stakeholders shall be considered for improvement.
- The institution shall explore innovative and sustainable transportation solutions in line with technological advancements and environmental goals.

9. Conclusion

Through this Eco-Friendly Transportation Policy, the college reaffirms its commitment to environmental sustainability and responsible mobility. By promoting electric vehicles, public transportation, and awareness initiatives, the institution aims to foster a greener campus and contribute positively to environmental conservation.
