**ABSTRACT :**

Prevailing environmental concerns has made it important to audit the components in our surroundings. This helps in understanding the damages caused by us and the ways in which it can be reduced. Today, green accounting is adopted by several corporate organizations including higher education institutions. It has helped the institutions to adopt eco-friendly practices and reduce their carbon credit, manage waste and implement environmental consciousness on the campus. The objectives of the paper are to understand the importance of green auditing in the campus of higher education institution, to analyse the level of awareness of green auditing among students of undergraduate level and to explain the above with the help of an example. The data is collected from secondary and primary sources both- survey and group discussions. The group discussion revealed that green audit has helped improve the quality of the campus and minimise wastage. The conclusion is that green audit is an important practice and must be adopted by all organizations. *Keywords: environment, green auditing, higher education, awareness, students*

**Introduction :**

Prevailing environmental concerns has made it important to audit the components in our surroundings. This helps in understanding the damages caused by us and the ways in which it can be reduced. Today, green accounting is adopted by several corporate organizations including higher education institutions. It has helped the institutions to adopt eco-friendly practices and reduce their carbon credit, manage waste and
