

**Issue No.:**

01/2016-17

**Date:**

19<sup>th</sup> August 2016

**Department:**

Mathematics & Statistics

**Circulation Details:**

Head of Departments/

Co-ordinators

**Approving Authority:**

**Principal & Chairperson of Academic Board**

**Dr. (Mrs) Ancy Jose**

**Signature of MR:**

**Dr. Moushumi Datta**

**NAGINDAS KHANDWALA COLLEGE OF COMMERCE, ARTS &  
MANAGEMENT STUDIES**

**AUTONOMOUS COLLEGE**

**DEPT: MATHEMATICS AND STATISTICS**

**(A.Y 2016-2017)**

**Question Paper Pattern**

**1) Internal Assessment (25%)**

**a) Class Test – 20 Marks**

**Duration: 30 Minutes**

**Section – I (Mathematics)**

**Topics: Shares and Mutual Funds**

- i) Attempt Any Two Out of Three (4 Marks each)**
- ii) Each Main Question includes calculation for more than one part.**

**Section – II (Statistics)**

**Topics: a) Measures of Central Tendency**

**b) Measures of Dispersion**

- i) Attempt Any Two Out of Three (6 Marks each)**
- ii) Each Main Question includes calculation for more than one measure**

**b) 5 Marks for active participation in the class room**

**2) Semester End Examination (75%)**

**Marks: 75 Marks**

**Duration: 2 ½ Hours**

**Note: i) All questions are compulsory**

- ii) Attempt any three sub questions from each main question consisting of four sub questions.**
- iii) Each sub question carries 5 marks.**
- iv) Graph papers are provided on request and only simple calculator is allowed**

**In all five main questions based on corresponding five different units of syllabus.**

**Name and Signature of H.O.D :**

## Semester I

### Course: Mathematical and Statistical Techniques-I

#### [A] MATHEMATICS: (30 marks)

##### Unit I: Shares and Mutual Funds

- (a) **Shares:** Concept of share, face value, market value, dividend, equity shares, preferential shares, bonus shares. Simple examples.
- (b) **Mutual Funds:** Simple problems on calculation of Net income after considering entry load, dividend, change in Net Asset Value (N.A.V.) and exit load. Averaging of price under the Systematic Investment Plan (S.I.P.)

##### Unit II: Permutation, Combination and Linear Programming Problems:

- (a) **Permutation and Combination:** Factorial Notation, Fundamental principle of counting, Permutation as arrangement, Simple examples, combination as selection, Simple examples, Relation between  ${}^nCr$  and  ${}^nPr$ , Examples on commercial application of permutation and combination.
- (b) **Linear Programming Problem:** Sketching of graphs of (i) linear equation  $Ax + By + C = 0$  (ii) linear inequalities. Mathematical Formulation of Linear Programming Problems upto 3 variables. Solution of Linear Programming Problems using graphical method up to two variables.

#### [B] STATISTICS: (45 marks)

##### Unit III: Summarization Measures:

- (a) **Measures of Central Tendencies:** Definition of Average, Types of Averages: Arithmetic Mean, Median, and Mode for grouped as well as ungrouped data. Quartiles, Deciles and Percentiles. Using Ogive locate median and Quartiles. Using Histogram locate mode. Combined and Weighted mean.
- (b) **Measures of Dispersions:** Concept and idea of dispersion. Various measures, Range, Quartile Deviation, Mean Deviation, Standard Deviation, Variance, Combined Variance.

##### Unit IV: Elementary Probability Theory:

- (a) **Probability Theory:** Concept of random experiment/trial and possible outcomes; Sample Space and Discrete Sample Space; Events, their types, Algebra of Events, Mutually Exclusive and Exhaustive Events, Complimentary events.

Classical definition of Probability, Addition theorem (without proof), conditional probability. Independence of Events:  $P(A \cap B) = P(A)P(B)$ . Simple examples.

(b) **Random Variable:** Probability distribution of a discrete random variable; Expectation and Variance of random variable, simple examples on probability distributions.

#### **Unit V: Decision Theory:**

Pay-off matrix; Decision making under uncertainty, Maximin, Maximax, Minimax regret and Laplace criteria; simple examples to find optimum decision. Formulation of Payoff Matrix. Decision making under Risk, Expected Monetary Value (EMV); Decision Tree; Simple Examples based on EMV. Expected Opportunity Loss (EOL), simple examples based on EOL.

### **Semester II**

#### **Course: Mathematical and Statistical Techniques-II**

#### **[A] MATHEMATICS: (30 marks)**

#### **Unit-1: Functions, derivatives and their applications**

(a) Concept of real functions:

Constant function, linear function,  $X^n, e^x, a^x, \log x$ .

Demand, supply, Total revenue, Average revenue, Total cost, Average cost & profit function.

Equilibrium point, Break-even point.

(b) **Derivative of Functions:**

Derivative as rate measure, Derivative of  $X^n, e^x, a^x, \log x$ .

Rules of derivatives: Scalar multiplication, sum, difference, product, quotient (Statements only),

Simple problem. Second order derivative

Applications: Marginal cost, Marginal revenue, Elasticity of demand. Maxima and minima for function in economics and commerce.

(Examination Questions on this unit should be application oriented only.)

#### **Unit-2 : Interest and Annuity:**

(a) Interest: Simple interest, Compound interest(Nominal & effective rate of interest),.

Calculations involving upto 4 time periods.

(b) Annuity : Annuity immediate and its present value, Future value. Equated monthly installment(EMI) using reducing balance method and amortization of loans. Stated Annual Rate & Effective Annual Rate Perpetuity and its present value. Simple problems involving upto 4 time periods.

**[B] STATISTICS: (45 marks)**

**Unit – 3 : Bivariate linear Correlation and Regression**

(a) Correlation analysis: Meaning, Types of Correlation, Determination of Correlation :

Scattered diagram, Karl Pearson's Method of Correlation Coefficient(excluding Bivariate Frequency Distribution Table) and Spearman rank correlation coefficient.

(b) Regression Analysis : Meaning, Concept of Regression equation, Slope of Regression line and its interpretation. Regression Coefficient (excluding Bivariate Frequency Distribution Table), Relationship between Coefficient of Correlation & Regression Coefficients, finding the equation of regression lines by method of Least Squares.

**Unit-4 : Time Series and Index Numbers**

(a) **Time Series** : Concepts and components of time series. Representation of trend by Freehand curve method, Estimation of Trend using moving average method and Least Squares method(linear trend only). Estimation of seasonal component using simple arithmetic mean for Additive Model only( For trend free data only). Concept of Forecasting using least square method.

(b) **Index Numbers**: Concept and usage of Index Numbers, Types of Index Numbers, Aggregate and Relative Index Numbers, Lasperye's, Paasche's, Dorbisch-Bowley's, Marshall-Edgeworth and Fisher's ideal index numbers, Test of Consistency: Time reversal test and factor reversal test. Chain Base Index Numbers. Shifting of Base Year. Cost of Living Index Numbers, Concept of real income, concept of Wholesale Price Index Number. (Examples on missing values should not be taken)

**Unit-5: Elementary Probability Distribution**

Probability Distributions:

**Discrete probability distribution**: Binomial, Poisson( Properties and Applications only, no derivations are expected)

**Continuous Probability Distribution**: Normal Distribution. (Properties and applications only, no derivations are expected)

**Examination:****Internal Assessment 25% (25 marks) :**

1. One midterm class test of 20 marks. Student's score will be converted out of 10 marks.
2. One group project/assignments/presentation of 10 marks.
3. Active participation in tutorial or lecture periods carry the maximum 5 marks.

**Semester End Examination 75% (75 marks)**

At the end of each semester, there will be a Semester End Examination of 75 marks , 2 1/2 hours duration and question paper pattern as shown below.

**Question Paper Pattern:**

1. In **Section I (based on Mathematics)**, two questions carrying 15 marks each. First question should be on Unit I and Second question should be from Unit II.
2. In each question there should be four sub-questions carrying 5 marks each. Students should be asked to answer any 3 sub questions from each question.
3. In **Section II (based on Statistics)**, Three questions carrying 15 marks each. First question should be on Unit III, Second question should be from Unit IV and third question should be from Unit V.
4. In each question there should be four sub-questions carrying 5 marks each. Students should be asked to answer any 3 sub questions from each question.

**Reference Books:**

1. Mathematics for Economics and Finance Methods and Modelling by Martin Anthony and Norman Biggs, Cambridge University Press, Cambridge low-priced edition, 2000, Chapters 1, 2, 4, 6 to 9 & 10.
2. Applied Calculus: By Stephen Waner and Steven Constenoble, Brooks/Cole Thomson Learning, second edition, Chapter 1 to 5.
3. Business Mathematics By D. C. Sancheti and V. K. Kapoor, Sultan Chand & Sons, 2006, Chapter 1, 5, 7, 9 & 10.
4. Mathematics for Business Economics: By J. D. Gupta, P. K. Gupta and Man Mohan, Tata McGraw Hill Publishing Co. Ltd., 1987, Chapters 9 to 11 & 16.
5. Quantitative Methods-Part-I By S. Saha and S. Mukerji, New Central Book Agency, 1996, Chapters 7 & 12.

6. Mathematical Basis of Life Insurance By S.P. Dixit, C.S. Modi and R.V. Joshi, Insurance Institute of India, Chapters 2: units 2.6, 2.9, 2.20 & 2.21.
7. Securities Laws & Regulation of Financial Market : Intermediate Course Paper 8, Institute of Company Secretaries of India, Chapter 11.
8. Investments By J.C. Francis & R.W. Taylor, Schaum's Outlines, Tata Mc-Graw Hill Edition 2000, Chapters 2,4 & section 25.1.
9. Indian Mutual Funds Handbook : By Sundar Shankaran, Vision Books, 2006, Sections 1.7,1.8.1, 6.5 & Annexures 1.1to 1.3.
10. STATISTICS by Schaum Series.
11. Operations Research by Gupta and Kapoor
12. Operations Research by Schaum Series
13. Fundamentals of Statistics - D. N. Elhance.
14. Statistical Methods - S.G. Gupta (S. Chand & Co.)
15. Statistics for Management - Lovin R. Rubin D.S. (Prentice Hall of India)
16. Statistics - Theory, Method & Applications D.S.Sancheti & V. K. Kapoor.
17. Modern Business Statistics - (Revised}-B. Pearles & C. Sullivan -Prentice Hall of India.
18. Business Mathematics & Statistics : B Aggarwal, Ane Book Pvt. Limited
19. Business Mathematics : D C Sancheti & V K Kapoor, Sultan Chand & Sons
20. Business Mathematics : A P Verma, Asian Books Pvt. :Limited.
