Organizes

### NURTURE THE PLANTS: PLANTS WATERING DAY

**Date:** 17<sup>th</sup> August, 2024

**Venue:** Outside Self Finance Building

**No. of Participants:** 16

#### Description

The Rotaract Club of Khandwala (RCK) recently conducted a meaningful “*Watering the Plant*” initiative as part of its ongoing commitment to environmental sustainability and community involvement. RCK members gathered at the designated community garden area, where they actively participated in nurturing the plants and reconnecting with nature. The event began with a short introduction by the organizing team, followed by members taking turns to water the plants and share thoughts on the importance of environmental care. The activity encouraged bonding among members and fostered a sense of shared responsibility towards nature. It also served as a platform for the community to witness the club’s dedication to greener living.

The Participant were watering the small plants which were in the college campus , to nurture the plants .

We successfully conducted our Plants Watering Day, and it was amazing to see the community come together to nurture and care for our green friends.
